Pricing Structure & Market Information

At Forever Frozen Seafoods, we believe in transparent, competitive pricing based on market realities.

⚠ Note on Pricing:

Seafood commodity prices fluctuate weekly based on fuel costs, exchange rates (USD/TWD), harvest sizes, and glaze percentages. The prices below are indicative structures only. For an exact quote, please contact our sales team with your target volume and destination port.

Pricing Factors

Factor	Impact on Price
Size Grade	Larger sizes (XL/XXL) command a premium over smaller sizes (XS/S).
Glaze %	Lower glaze (0-5% Net) increases price per kg compared to standard glaze (15-20%).
Incoterms	FOB Taiwan (Base Price) vs. CIF Your Port (Includes Freight & Insurance).
Volume	Full Container Load (FCL) receives preferential pricing over LCL.
Packaging	Standard bulk packing is most economical. Private Label/OEM incurs additional setup costs.
